

EYEBOLT SPECIFICATIONS

1" Forged Steel eyebolts are rated for lifting (500lbs). The stem has a 1/4-20 thread with a hex jam nut to lock the eyebolt in any position. Eyebolts require threaded inserts and can be installed along the perimeter on the back or sides of the MirrorLite mirror aluminum frame. We suggest eyebolts and threaded inserts be installed at least every 4 feet around the perimeter of the Mirror panel.
